

What is claimed is:

1. A new patent comprising:

means for method of creation of magnetized water for  
plant mammal and human consumption absorbing and  
assimilation of water to support restore and give  
enhancement to biological function;  
means for power to oscillator;  
means for electrical conducting wire;  
means for electrical insulation for electrical wiring;  
means for electromagnetic scalar waves using  
electromagnetic energy; and  
means for transport energized enhanced water to  
biological life to be enhanced.

2. A new patent comprising:

means for electrical conducting wire;  
means for electrical insulation for electrical wiring;  
means for creation of electromagnetic scalar waves using  
electromagnetic energy;  
means for transport energized enhanced water to  
biological life to be enhanced; and

means for electrical power to conductive wiring.

3. A new patent comprising:

means for variation of biological enhancement per  
individual biological organism

4. The new patent in accordance with claim 1, wherein said means  
for method of creation of magnetized water for plant  
mammal and human consumption absorbing and assimilation  
of water to support restore and give enhancement to  
biological function comprises a water magnetizer.

5. The new patent in accordance with claim 1, wherein said means  
for means to provide power to oscillator comprises a  
power supplied.

6. The new patent in accordance with claim 1, wherein said means  
for means to provide electrical conducting wire comprises  
an electrical conductor.

7. The new patent in accordance with claim 1, wherein said means  
for means to provide electrical insulation for electrical  
wiring comprises an electrical insulator.
8. The new patent in accordance with claim 1, wherein said means  
for means to provide electromagnetic scalar waves using  
electromagnetic energy comprises an electromagnetic  
scalar waves.
9. The new patent in accordance with claim 1, wherein said means  
for means to transport energized enhanced water to  
biological life to be enhanced comprises a water  
transport.
10. The new patent in accordance with claim 2, wherein said means  
for means to provide electrical conducting wire comprises  
an electrical conductor.

11. The new patent in accordance with claim 2, wherein said means for means to provide electrical insulation for electrical wiring comprises an electrical insulator.

12. The new patent in accordance with claim 2, wherein said means for means to provide electromagnetic scalar waves using electromagnetic energy comprises an electromagnetic scalar waves.

13. The new patent in accordance with claim 2, wherein said means for means to transport energized enhanced water to biological life to be enhanced comprises a water transport.

14. The new patent in accordance with claim 2, wherein said means for electrical power to conductive wiring comprises an electrical power.

15. A new patent comprising:

an electrical conductor, for means to provide electrical  
conducting wire;

an electrical insulator, for means to provide electrical  
insulation for electrical wiring;

an electromagnetic scalar waves, for means to provide  
electromagnetic scalar waves using electromagnetic  
energy;

a water transport, for means to transport energized  
enhanced water to biological life to be enhanced; and

an electrical power, for electrical power to conductive  
wiring.
